PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer and B.Tech student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in computer vision, NLP, and predictive modeling. Skilled in Python, scikit-learn, XGBoost, LightGBM, and deep learning frameworks. Proven ability to build end-to-end ML pipelines and deploy AI-powered features in production environments through internship experience.

EDUCATION

B.Tech – Computer Science (Artificial Intelligence & Machine Learning) | Pranveer Singh Institute of Technology, Kanpur, UP | 2023 – Present | CGPA: 8.65

12th Grade – CBSE Board | 2022–2023 | 80.4%

10th Grade – CBSE Board | 2020–2021 | 92.16%

WORK EXPERIENCE

AI Intern | Tackle Studioz | Nov 2025 – Jan 2026

- Developed and deployed a real-time face emotion recognition system using OpenCV and deep learning, integrating it into live production applications.
- Optimized model accuracy and inference performance for continuous video stream processing.
- Collaborated cross-functionally with the product team to integrate AI features into client-facing applications.

PROJECTS

Credit Card Fraud Detection

- Built a fraud detection system on a highly imbalanced dataset (0.17% fraud rate) using Logistic Regression, Random Forest, XGBoost, and LightGBM.
- Improved minority-class recall via ensemble stacking (XGBoost + LightGBM + Random Forest), achieving ROC-AUC of 0.96.
- Performed hyperparameter tuning with Optuna to maximize model performance.

Real-Time Emotion Recognition

- Implemented a facial emotion detection system using computer vision (OpenCV, MTCNN, FaceNet) to classify multiple human emotions in real time.
- Optimized inference pipeline for low-latency processing of continuous live video streams.

AI Communication Coach

- Designed a Flask-based web application that analyzes user text input for tone, politeness, and clarity using NLP techniques (NLTK, TextBlob).
- Built a hybrid AI pipeline combining rule-based and ML-driven sentiment analysis for actionable communication feedback.

Calorie Prediction Model

- Developed a regression model to predict calorie expenditure from physical activity data using Python and scikit-learn.
- Applied feature engineering techniques to improve predictive accuracy; validated model performance using cross-validation.

SKILLS

Machine Learning: Scikit-learn, XGBoost, LightGBM, Logistic Regression, Random Forest, Ensemble Stacking, Hyperparameter Tuning (Optuna), Feature Engineering, Imbalanced Data Handling, Model Evaluation

Deep Learning & Computer Vision: LSTM, FaceNet, MTCNN, OpenCV

NLP: NLTK, TextBlob, Sentiment Analysis, Text Classification

Programming: Python, SQL, Java (Basics)

Tools & Libraries: NumPy, Pandas, Matplotlib, Flask, Jupyter Notebook, VS Code

Core CS: Object-Oriented Programming (OOP), DBMS (Basics)

CERTIFICATIONS & ACHIEVEMENTS

- GenAI Powered Data Analytics Job Simulation – Forage
- AI Machine Learning Engineer Certificate Course – Reliance Foundation Skilling Academy
- Machine Learning Workshop Completion Certificate – Softpro India Pvt. Ltd.
