

AI Career Roadmap

Student · Python / Data · 3-Month Sprint · Get a Job

■ CURRENT POSITION

- **Role:** Student
- **Skills:** Python, NumPy/Pandas basics, Data Analysis
- **Strength:** Technical foundation in place
- **Gap:** No real-world projects or portfolio

■ TARGET GOAL

- **Objective:** Land a Data/Python Job
- **Roles to target:** Data Analyst, Jr. Data Scientist, Python Developer, ML Engineer Intern → Full-time
- **Timeline:** 3 Months (90 days)

■ SKILL GAP ANALYSIS

Skill Area	Current Level	Required Level	Priority
Python (Core)	Intermediate	Advanced	■ High
Pandas / NumPy	Beginner	Proficient	■ High
SQL	None	Proficient	■ High
Machine Learning	None	Basic	■ Medium
Data Visualisation	None	Intermediate	■ Medium
Git / GitHub	None	Basic	■ Medium
Communication / CV	Unknown	Job-Ready	■ Critical

■ LEARNING PLAN

Month 1 — Foundations

- Python OOP, file I/O, error handling
- Pandas deep-dive: cleaning, merging, groupby
- SQL: SELECT → JOINS → window functions

Month 2 — Applied Skills

- Matplotlib / Seaborn / Plotly dashboards
- Scikit-learn: regression, classification, metrics
- Git + GitHub (repos, commits, PRs)

Month 3 — Job-Ready

- End-to-end project + Kaggle competition
- Resume, LinkedIn, portfolio site
- Mock interviews + LeetCode (Easy/Medium)

■ SUGGESTED PROJECTS

Project 1 (Month 1)

COVID-19 / IPL Data Analysis — EDA with Pandas, visualised with Seaborn. Push to GitHub.

Project 2 (Month 2)

Sales Dashboard — interactive Plotly/Streamlit dashboard from a real dataset (Kaggle).

Project 3 (Month 3)

ML Price Predictor — end-to-end: data clean → model → deployed on Streamlit Cloud.

Bonus

Kaggle competition (top 40% = resume-worthy)

■ 90-DAY MILESTONES

Month 1 (Days 1–30)	Month 2 (Days 31–60)	Month 3 (Days 61–90)
■ Complete Python + SQL course	■ Build & publish 2 projects on GitHub	■ Apply to 30+ jobs/week
■ Finish EDA project on GitHub	■ Deploy Streamlit dashboard	■ 5+ referrals from LinkedIn
■ 50 LeetCode easy problems	■ 100+ LinkedIn connections	■ Crack 2 technical interviews

■ NETWORKING STRATEGY

- Optimise LinkedIn: headline + 500 connections
- Post 3×/week: projects, learnings, insights
- DM 5 data professionals/week for coffee chats
- Join communities: Kaggle, DataTalks.Club, Analytics Vidhya, Discord servers
- Attend virtual meetups / hackathons
- Ask for referrals — 70% of jobs via network

■ IMMEDIATE NEXT ACTIONS

1. Create GitHub account today
2. Start **Python for Everybody** (Coursera, free)
3. Complete **Mode SQL Tutorial** (3 hrs, free)
4. Update LinkedIn with 'Open to Work'
5. Download a Kaggle dataset → start EDA
6. Solve 2 LeetCode Easy problems today
7. Draft your 1-page resume (use Harvard template)
